

Betsy Smidinger: Priority NPL Site Visits

Her good weeks are: June 5, June 19, July 10, July 24, August any time. Day trips Weds/Thurs are best. Work with Noah on scheduling.

Colorado

1. We've done a week long tour of NPL sites in Colorado for OSRTI staff/managers with an itinerary that goes like this:
 - a. Colorado Smelter, Pueblo
 - b. Summitville Mine, Southfork
 - c. Nelson Tunnel/Commodore Mine, Creede
 - d. Eagle Mine, Minturn
2. California Gulch, Leadville, is a full day driving trip from Denver
3. Central City/Clear Creek, is a full day driving trip from Denver
4. Captain Jack, is a half day driving trip from Denver
5. BPMD, Silverton/Durango/SUIT

Montana

1. Butte/Anaconda area: We can visit these sites either on one of the trips for negotiating the CD with ARCO, or along with the State/Superfund Directors' meeting.
2. Sites near Helena: We can visit the following sites as part of a visit to the EPA office in Helena: Upper Tenmile, Basin Mining, East Helena Site.
3. Libby Asbestos/Libby Groundwater: Because of its remote location, Libby is a stand alone trip. Plan on 3-4 days (2 days travel; 2 days site tour).
4. Anaconda Aluminum, Columbia Falls: Also a stand alone or could be combined with Libby for a full week of travel.
5. Sites near Great Falls are ACM Smelter, Barker Hughesville and Carpenter/Snow Creek.
6. Sites near Missoula: Flat Creek/Iron Mountain Mine, Smurfit Stone Mill.

Utah

Most of the sites in Utah are located within a few hours driving distance from SLC. Key sites to visit include:

1. Kennecott, SLC, full day tour.
2. Hill AFB & Defense Depot Ogden, full day tour.
3. Park City/Richardson Flats
4. Jacobs Smelter, Stockton full day tour.
5. 700 South, SLC

South Dakota

1. Gilt Edge Mine, near Lead/Deadwood
